University Open Ended Items

Open 1 What helped you learn in this course?

- Going to class and going to Office Hours
- HW, Quiz, Practice exam, Quiz Hint. These give a list of what to study.
- Professor held amazing lectures, was funny, a very personable man. 10/10 recommend
- Attending class
- The office hours were a great help. The instructor was a great help. He always made the concepts easy to understand and went above and beyond in ensuring our learning.
- The lectures, homework's and practice exams
- Going to lecture, and the clear explanations of all the topics that were explained throughout.
- notes and homeworks
- going to class
- Mr. Kim!
- The professor’s passion for the class, his willingness to help students during class and office hours, and writing everything on the board
- Going to class and working on homework problems.
- The lectures were very helpful in explaining and understanding concepts. The homework was also appropriate.
- Kyongwon's lectures and the lecture slides helped me learned in this course.The lecture slides always had the information and he would present us with the examples we would need.
- 100% the professor. did not even go to other sources
- Professor Kim was extremely kind and showed a genuine interest in our wellbeing inside and outside of the classroom. Knowing that he cared about more than just “getting through the syllabus” (which he still did) made me all the more engaged.
- Office hour helps a lot
- Textbooks, khan academy, The lectures, homeworks especially, practice exams.
- The textbook was very good.
- tons of examples on how to solve questions and how to use new methods.
- Open 2 What changes would improve your learning?
- Homework could've been a bit longer
- Put solutions to examples in the lecture notes in the notes also

Personally, everything is fine.

N/A

I would not change anything whatever you are doing now works just fine.

Nothing comes to mind, this was a very well organized and taught course

maybe give some more examples to tell us why me learn some topics.

Don't know.

Not much

None come to mind.

Nothing, the professor made this the best course I've ever taken

I dont think much could improve our learning.

Nothing!

Not sure

Unrestricted Items

MATHopenended001 What feedback would you like to share about the course?(For example, you may wish to address the helpfulness of the textbook, usefulness of online materials, difficulty of the material, fairness of the exams, or amount of work required.)

Exams are very fair

The exams were very fair. The homework helped you grasp all the concepts very well and made sure you were ready for the quiz.

Everything was very fair, everything. Despite being the first time teaching, the professor did an outstanding job.

I really enjoyed the structure of the course and felt like, this type of approach really helped me grasp the concepts needed to succeed in the course.

everything provided was helpful for the course and the instructor was very good

MATHopenended002 What feedback would you like to share about the instructor?(For example, you may wish to address the clarity of explanations, effectiveness of communication, ability to stimulate critical thinking, class preparation, availability for help, ability to maintain interest, or motivation.)

Had a great time, learning stats in 319!

Kyongwon kim was one of the best professors I have had. He made material fun and easy to understand and went above and beyond in helping students.

I haven't had a better teacher in my 3.5 years of being here.

Everything that was done was done perfectly with the degree of teaching and explanation. Everything you did was great.

Super helpful and supportive of students. Always available to help out.

I'm not a huge fan of statistics, but Mr Kim always made lessons interesting and clear for me. I love his teaching style and his passion for the subject of statistics, and admire his ability to communicate lessons effectively with the students on our own sort of level, never talking down to us. I have a lot of respect for him as a teacher and am grateful to have been his student.

Does a good job putting examples and notes in terms what we understand

the instructor was very helpful and clear in class and made the class very fair

instructor info What did you like or dislike about this instructor

Kyongwon is the shining gem in the dismal departments of Math/Statistics.His explanations are almost always clear, and he emphasizes the main points of what we will need to learn and how it applies to what we will be doing in our careers.He has been the single best instructor during my time at Penn State.He wants to see us succeed and does not want to burden us.

I liked my professor didn't drown us in the stat.

Kyongwon is probably one of the best professors/instructors I have ever had. He does a fantastic job at explaining concepts, spiraling material so that we understand the broader picture of what we're learning, as well as asking for and answering questions. At every point in the material, I had a sense of what we were learning, how it applies to previous material, and why it was important for the course. I have no complaints and feel very grateful to have been taught by Kyongwon in a subject that I find very difficult.

The professor was always helpful and made sure everyone understood the content.

The last statistics professor I had would give us a lot of extremely repetitive homework problems that just involved repetitive basic math. It felt very disrespectful that the past professor had no regard for our time and was just wasting our time by making us do this busy work that we've known how to do since first grade (addition and subtraction)! Professor Kim RESPECTED our time and DID NOT do this. He picked out problems and parts of problems that were actually core to what we were learning so that he didn't waste our time. We still learned everything we needed to and were prepared for exams.

The professor's enthusiasm for the class and and his willingness to help students

Nothing especially.

I really liked the professor. One of the best professors I ever had throughout the 3 years I had in college. How he cares that you understand and cares about the students. I got a C in 318 and right now I'm getting an A so this really does say something about him.

The instructor was very friendly and accommodating for excused absences. He was also forthright with the material covered and what we were expected to know.

i like the exam-oriented way of teaching, it is really helpful for exams and we can understand topics during doing exercises.i like your efficient teaching style.

Everything! We love you Mr. Kim!

The instructor was very nice and respected that this was one of many classes we had to take. He made the class completely manageable, but I still learned a lot.

recommendations Do you have any suggestions?

I have no suggestions! I thought the course was good!

Maybe you can give some general questions and ask us to distinguish each elements that we need from the question, instead of give us directly. for example, you can ask us to distinguish I and J in ANOVA instead of giving them directly.

Not really

No.

Nope, I liked the flow of the course

I think the class could be a little harder and academically rigorous. Although it was one of my less challenging and time-consuming classes, students could benefit from it being a bit higher.

Nope!

prep for class How many hours outside of class did you spend preparing for class?

About 2 hours a week.

2-4 depending on the week.I would usually spend 1 - 3 hours on homework and prepare for exams for 8 hours

I spent 30 mins - 2 hours on the homework, depending on the week. I spent a few hours before each exam preparing.

6

5 hours per week

about 4 hours a week

About 1 hour for the homework and any quiz prep each week and maybe 2 hrs for exam prep

Don't know

one day preparation for exam. 2.5 to 3.5 hours each week for homework and quiz.

How comfortable do you feel about

comfortable asking questions either in or out of class?
